Complete Respiratory Panel

We offer several respiratory panels to fit the needs of your patient testing. Our Respiratory Pathogen Panels are qualitative assays designed to concurrently identify and detect nucleic acids of multiple respiratory viruses and bacteria extracted from nasopharyngeal swabs obtained from individuals presenting clinical manifestations indicative of respiratory tract infection. Results can be obtained on the same day with the Respiratory Pathogen Panel.

Respiratory Panels

COVID-19 Only - COVID-19

COVID/Flu/RSV - COVID-19, Flu, RSV

COVID Respiratory Lite - COVID-19, Flu, RSV, H. influenzae, M. catarrhalis, M. pneumoniae, S. pyogenes (Group A Strep)

COVID Respiratory - COVID-19, Flu, RSV, H. influenzae, M. catarrhalis, M. pneumoniae, S. pyogenes (Group A Strep), Adenovirus, Bocavirus, B. pertussis, C. pneumoniae, Coronavirus (229E, HKU1, NL63, OC43), EBV (mononucleosis), Enterovirus, HMPV A&B, Parainfluenza virus (type 1-4), Rhinovirus A&B, S. aureus, S. pneumoniae

COVID Respiratory Plus - COVID-19, Flu, RSV, H. influenzae, M. catarrhalis, M. pneumoniae, S. pyogenes (Group A Strep), Adenovirus, Bocavirus, B. pertussis, C. pneumoniae, Coronavirus (229E, HKU1, NL63, OC43), EBV (mononucleosis), Enterovirus, HMPV A&B, Parainfluenza virus (type 1-4), Rhinovirus A&B, S. aureus, S. pneumoniae, A. baumannii, E. cloacae, K. aerogenes, K. pneumoniae, L. pneumophila, P. mirabilis, P. aeruginosa, S. epidermidis and ABX resistance marker Methicillin/Oxacillin (mecA)
